

## Complete Production Floor Integration

See how Select Technologies Inc. can help you integrate your line into one seamless system.

# LINE INTEGRATION

**Production Line Integration:** Select Technologies Inc. recently teamed up with a major food manufacturer to design, integrate, and startup an automated system for a sausage patty continuous production line. Select Technologies Inc. united the equipment to run at **110% of the designed capacity**. Complete integration consisted of the following:

- ◆ Production Line Layout
- ◆ Mechanical Install of Equipment
- ◆ Electrical and Mechanical Design
- ◆ Control Panel Assembly and Testing
- ◆ Startup and Commissioning
- ◆ Electrical System Installation
- ◆ Post Tuning of System Operation
- ◆ Training of Maintenance Personnel

**Superior Results:** The automated system set a benchmark for production lines throughout the facility. Select Technologies Inc.'s single source responsibility for the entire system **eliminated confusion between vendors on the project**.

Select Technologies Inc. delivers a **total coordinated turnkey approach to projects**. This creates a cost effective, detailed, and reliable system even in the most challenging situations.

**Additional Services:** Select Technologies Inc. is a full service industrial integrator specializing in a wide range of services.

### ◆ Facility Controls

Ammonia Refrigeration,  
Compressed Air Systems,  
Sanitary Air Handling

### ◆ Material Handling

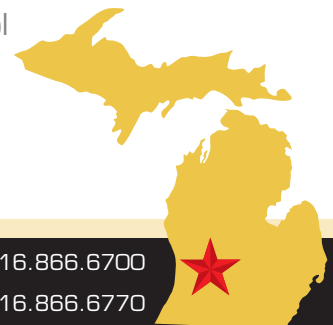

Case, Pallet, Water and Waste  
Water Systems, De-palletizing,  
Palletizing

### ◆ Process Controls

Clean In Place Systems,  
Production Control Systems,  
Product Chilling, Oven Control

### ◆ Client Services

Project Coordination,  
Project Management,  
Design, Installation Startup
